Couch or use in specialty stitches • 2 colors

Kreinik Cable™

This 3-ply twisted thread resembles a real metal thread or a rope. It is ideal in specialty stitches like Herringbone, or long stitches that show off this unique texture. It is slightly stiffer than a regular metallic, so use a needle with a larger eye to accommodate Cable.

Cable Colors

_____ Gold 002P
_____ Silver 001P

Visit Needlework > Threads > Metallic Threads > Cable on www.kreinik.com for ideas, photos & tips.

Loosely twisted, slightly fuzzy • 8 colors

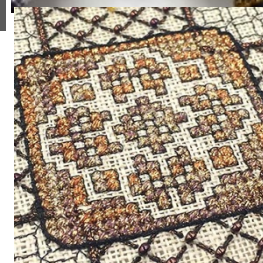

Kreinik Ombre™

8-ply, loosely twisted metallic. Adds a slightly fuzzy texture to embroidery, cross stitch, needlepoint, also weaving, and machine bobbin work. Can be used in knitting and with knitting machines to make soft, drapable metallic accents in clothing. If used in cross stitch, use a needle with a larger eye.

Ombre Colors

_____ 1000 Silver	_____ 1700 Misty Gold
_____ 1100 Misty Lime	_____ 2000 Gold
_____ 1200 Misty Apricot	_____ 2100 Copper
_____ 1300 Misty Violet	_____ 3200 Pearl

Visit the Ombre section under Needlework > Threads > Metallic Threads on www.kreinik.com to see this unique textured thread in use.

Kreinik Japan Threads™

Round, smooth, bright metallics that resemble real metal threads. Japan #1 is the thinnest, like a fine Cord. Japan #5 and #7 are wrapped gimps you couch for surface embroidery. Lovely as outlines (gives a cloisonne effect). Learn more and see photos in Needlework > Threads > Metallic Threads > Japan Threads at www.kreinik.com.

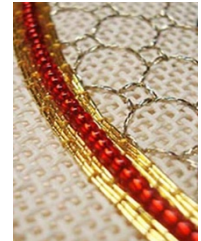

JAPAN #1 (the thinnest)

Use this thin thread for outlining, backstitching or couching real metal threads, Japan #5 or Japan #7, paillettes, or other embellishments.

Japan #1 Colors

_____ 001J Japan Silver
_____ 002J Japan Gold
_____ 321J Dark Japan Gold

Kreinik metallic threads are hand and machine washable. It's always a good idea to test a thread for colorfastness before washing. Tumble dry on low. Do not iron directly on the metallic; use a press cloth and no steam.

Highly iridescent flat ribbon • 1 color in 2 widths

Kreinik Easter Grass™

Flat, high-sheen ribbon available in 2 widths. Color is iridescent, like a mother-of-pearl look. Ideal in long stitches in needlepoint, embroidery, cross stitch, all fiber arts.

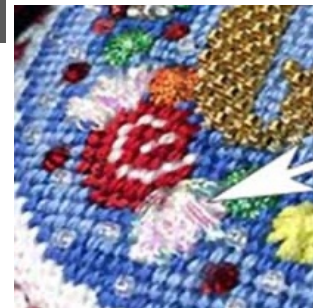

This is a popular thread in needlepoint: lay it over a painted canvas or stitched area to make something look like glass. It also makes realistic candy wrappers in needlepoint, cross stitch, and embroidery designs (use in long straight stitches).

100% silk for any needlework • 3 options

Kreinik Silk Threads

Kreinik's silk line consists of two filament silks and one spun silk that can be used in many techniques. These silks come in some of the same colors, which creates stunning stitchery when used together: light reflection (spun vs filament silk) and texture (strands vs twisted silk).

- Silk **Mori**®, a 6-ply spun silk floss — 'creamy' lustre — comes in skeins
- Silk **Serica**®, a 3-ply twisted filament silk thread — high sheen — on spools
- Silk **Bella**™, a finely twisted, thin filament silk thread — bright lustre — on spools

A **Silk Color Card** is available (actual thread swatches for true color matching)

Visit the silk pages under Needlework on kreinik.com for ideas, photos & stitching tips

Thin, tightly twisted silk for stitching & couching • 45 colors

Kreinik Silk Bella™

Thin, 3-ply finely twisted filament silk ideal for couching thicker threads, Hardanger woven bars and picots, fine details in cross stitch, needlepoint, embroidery, crazy quilting, and more. Beautiful even when stitched on the tiniest silk gauze and finest linens.

3-ply twisted filament silk • 155 colors

Kreinik Silk Serica®

3-ply, twisted 100% pure FILAMENT SILK with a bright sheen. Beautiful in embroidery, Hardanger, needlepoint, bead knitting, crazy quilting, fiber arts. Use as a twisted silk, or it can be separated for use as a flat silk. We recommend using a non-greasy hand cream before stitching with Serica.

Visit [Needlework > Silk Threads > Silk Serica](#) to see the many ways you can use this beautiful thread. IF you separate it, for instance, you get a wavy thread. If you separate and dampen it, it becomes a flat silk.

Silk Serica is similar to pearl cotton: it is a twisted thread, beautiful in longer stitches that show off this texture

Conservationists recommend dry cleaning silk thread embroidery. If you decide to wash your silk project, test to make sure colors won't run (stitch on a scrap piece of fabric or canvas and wash that). Store textiles away from direct light, and wrapped in acid-free tissue paper.
